

REMICADE (Infliximab) INFUSION

AT YOUR HOME

Whether you are already a Remicade patient or a healthcare provider, you should know that this infusion can be done in the comfort of home.

For many years **Nextron Infusion Services** has treated with success thousands of Remicade patients in New Jersey State and New York City with a High Tech Nursing Remicade Team.

Why Remicade Infusion at home?

1. The script from the Doctor is good up to 12 months;
2. Treatment is available during evening hours or week-ends;
3. The patient saves time and money not traveling to the Treatment Center;
4. Privacy in the comfort of their home;
5. Each patient develops a relationship with our dedicated Nurse who will be present during the entire treatment;
6. The patient can decide their agenda according to their time priorities not somebody else's;
7. Interactions with the Doctor will be reinforced by the support of Nextron Nurse and Nextron Pharmacy Team;
8. Nextron Nurse calls the patient the day before treatment to confirm the visit and ask if there are questions or concerns;
9. Nextron team will take care of verifications, authorizations and benefits with the Insurance Health Plan.

Remicade is a personalized therapy, why not do it in the comfort of your own home!

Call **Nextron Infusion Services** at 1-973-575 0614 or 1-800-241 2376 and ask for Lori, Chrissy or Jen. You will be helped directly by one of our skilled employees and not an answering machine.
